

# Emergencies don't make plans.

But you can.

Automatically initiate an entire series of unique emergency actions that you've created in advance. That's Scenarios from Omnilert.

## SCENARIOS DOES ITS JOB SO YOUR TEAM CAN DO THEIRS.

Critical events require much more than an alert. Launch a full series of predefined actions and communications throughout the entire crisis management lifecycle — before, during, and after a situation.

Well in advance of the adrenaline ever hitting your team, your plan is already underway. You can create multiple unique actions for each Scenario that map directly to your emergency action and response plans. Based upon the specific situation, Scenarios can:

- Align, capture, and immediately initiate your emergency response plan's predefined series of unique actions
- Give life to your emergency action and response plan
- Flawlessly orchestrate emergency communications and response from beginning to end

*With Scenarios, your team, a group of experts who know how to handle the urgent business at hand, is prepared.*

## NO WASTED TIME. NO CONFUSION. NO HASSLES.

Initiate multiple customizable messages to unique people, groups, and endpoints.

Activate connected, emergency safety hardware's audible and visual prompts.

Launch command dashboards.

Notify and coordinate with local first responders.

Initiate conference or web calls for Unified Command response.

Interact with and manage incoming responses.

## Plan for every Scenario.

And initiate a complex emergency response in seconds.

**Empower the precise orchestration of emergency communications and response for recognized crises, hazards, and exposures.**

- Active Shooter or Intruder
- All Clear
- Bomb Threat
- Chemical Spill
- Earthquake
- Evacuation
- Executive Communication
- Fire
- General Security
- IT Outage
- Non-Violent Crime
- Traffic Routing
- Unauthorized Person
- Unscheduled Closure
- Utility Failure
- Vehicular Accident
- Weather
- Workplace Violence

### **AUTOMATICALLY TRIGGERING A PREDEFINED SERIES OF ACTIONS WITH CONFIDENCE**

*A complete solution that is a quantum leap in emergency planning, communications, and response - with your success built in.*

You never know where you will be when an emergency strikes. Scenarios makes it easy to respond wherever you happen to be. Omnilert's web, mobile, and Apple Watch applications allow you to quickly initiate complex, predefined emergency response actions immediately.

With the enhanced ability to integrate with an increasingly connected world, you can improve critical communications and response by automatically initiating specific responses based upon alerts from independently monitored systems.

Emergencies happen. Be confident in your response efforts for the most important minutes of a crisis with Scenarios.

Master your next Scenario.
