

Omnilert Gun Detect

Seamless Integration of Leading AI Gun Detection and Full-Scale Emergency Management

STOP GUN VIOLENCE BEFORE IT BEGINS

Omnilert Gun Detect is a comprehensive, preventative platform that combines innovative AI gun detection with the industry's leading emergency management service. Coupled with an organization's own video surveillance system, the result is a seamless, end-to-end solution that encompasses gun detection, notification, engagement and full crisis management for a proactive response to gun violence.

Built on an open architecture, Omnilert Gun Detect offers complete interoperability with most security camera and video monitoring installations, extending and enhancing investments in this existing hardware.

Unlike other solutions that merely provide weapon identification, Omnilert Gun Detect has a three-step verification process that not only recognizes a gun but also behavior consistent with gun violence. When a threat is present, the Omnilert system triggers an alert that sets the security team into action, along with prescribed notification scenarios.

Omnilert Gun Detect delivers instant gun detection, near-zero false positives and the confidence that your people, buildings and assets are protected.

OMNILERT GUN DETECT CAPABILITIES:

Proactive, Preventative Surveillance:

- Instant Recognition — Identifies guns and gun threats, within seconds
- 24x7x365 Monitoring — Always on, always watching
- Ubiquitous Coverage — Monitors every camera and every angle

Next-Gen Technology:

- Artificial Intelligence (AI) — Identifies guns, and goes beyond other providers to identify gun threats
- Near-Zero False Positives — AI and human validation ensures false positives are all but eliminated

Lower Costs, Better Safety:

- Improved Detection — Automation allows 100% analysis, no missed frames
- Extends Investment — Enhances value of existing video/camera safety solution
- Reduces Costs — Transfers surveillance task from man to machine

Comprehensive Platform, Easy to Use:

- Full Data — Location, activity, threat and real-time video
- One-Click Activation — Preplanned alert and emergency management strategy
- End-to-End Solution — Encompasses detection, notification, engagement and management

Seamless Integration:

- Open Platform — Enables interoperability with current security environments
- Unified Emergency Management — From gun detection to emergency messaging and management

Over 2,500 organizations trust Omnilert's leading edge technology, including:

American
Red Cross

Founded in 2004, Omnilert pioneered the emergency mass notification market and is the innovation leader and trusted partner to thousands of institutions, including education, healthcare, manufacturing, private and public sector organizations.

Omnilert is privately held and headquartered outside of Washington, DC.
