

Critical Communications Across Your Organization. Instantly.

Organizational safety is a full-time job. During critical events, getting the right message to the right people is an imperative piece of your emergency response plan. Preplanned communication, situationally aligned, and delivered to the right people reduces human error during times of high stress. Before things get hectic, you've already sent the word out.

Reach anyone on any platform. Instantly.

When the unexpected happens, Omnilert is the fastest, most reliable way to reach your people. So no more phone trees and missed emails. Now there is a better way to initiate critical response communications across all technologies and devices.

Reach every person no matter where they are.

Scenarios®

With Scenarios, you can align, capture, and initiate your organization's emergency response plan's predefined series of unique actions. Emergency response is quicker, easier, and more effective - long before issues arise.

Active Shooter Scenario Initiation

Calm. Cool. Communicated.

Here's why thousands of organizations depend on Omnilert everyday.

Intuitive User Interface

Designed for use under duress, you can get up-to-speed quickly and take action when needed. Powerful and feature-rich, yet easy to use.

Cloud-based Access

Log in to failure-resistant infrastructure available from any desktop or mobile device.

Flexible User Management

Optimize your user management options—including opt-in, opt-out, and self-service subscriptions. Connect your systems directly with the Omnilert API.

Success Program

A dedicated team to help you set-up, customize, deploy, train, test, and improve. Constantly accessible 24/7.

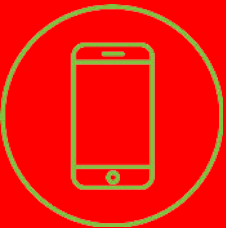

Actionable Reporting

Track recipient confirmations, polling results, and other feedback. See data as it comes in and view message and high-level subscriber statistics.

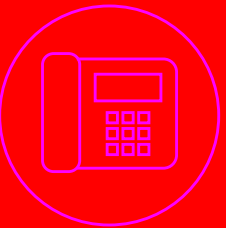

Grouping & Multi-level Administration

Organize recipients into public or private groups and by department, geography, or role. Enforce access and policy compliance with custom admin role permissions.

Mobile Device Applications

Send notifications to smart phones and interact with users during an event. Allow users to send tips, quickly contact emergency services, and access safety resources.

Instant Conferencing

Instantly connect your people during a crisis with a secure outbound conference call. Reach everyone wherever they are.

Instant Hotline

Handle thousands of simultaneous callers with your dedicated emergency information hotline that works even when your phones are down.

Inbound Tips

Use tips to prevent and solve problems faster. Empower anyone in your organization to submit tips from any mobile device.

**A connected organization
is informed.**

**Informed people
are empowered.**

MAKING THE CONNECTIONS
THAT COUNT.
