

Emergency Communication Solutions

Broadest and Most Comprehensive Solutions

Omnilert offers the broadest array of solutions, spanning prevention, notification, engagement, and critical event management, as well as the most comprehensive multi-channel communications.

Our Solutions Are Built on These Core Properties	
	Omnimodality The industry's widest range of communication channels to give you the greatest reach.
	Reliability Nearly 92% of customers agree we are the most trusted emergency mass notification partner.
	Automation Accuracy and responsiveness through pre-defined actions and workflows.
	Artificial Intelligence (AI) Leading edge technology to help prevent critical incidents and manage the data tsunami.

Omnilert critical event management and emergency mass notification systems can be set up in a matter of minutes with no software to install or maintain. As a hosted service, updates roll out regularly and new users and capabilities can be accommodated immediately as your emergency response plan evolves.
